

Subject: Pass Environmental Legislation in Build Back Better Act
March 27th, 2022

Dear

I am one of your constituents. I am writing to urge you to support the Build Back Better Act as is or with minor revisions in order to make a strong investment that dramatically reduces our carbon emissions, invests in clean energy technologies and jobs, and seeks to provide environmental justice.

I support this bill because it will catalyze our private sector and allow our country to be a global leader in climate saving technologies while also recognizing that we need to support previously harmed communities.

Thank you for working to save our environment,
