

Subject: Pass the Hope for Homes Act
March 27th, 2022

Dear

I am one of your constituents. I am writing to urge you to support HOPE for HOMES Act as a stand-alone bill or included in any federal infrastructure stimulus or climate legislation this term.

I support this bill because it reduces our nation's carbon footprint by retrofitting residential building thereby helping homeowners and renters save money while also investing in job training to meet the demand that this bill will create.

Thank you for working to save our environment,
